

SWITCH SOLUTIONS FOR MEDICAL APPLICATIONS

www.ckswitches.com

The Medical industry continues to design a greater number of advanced features into minimally invasive medical device equipment and tools. Patients are getting deeper and more involved in their personal health care. They are demanding advanced tools with greater functionality. Artificial Intelligence (AI) is at the door step of advanced medicine. Global trends are advancing Internet of Things (IoT) advanced technology into every corner of the home and hospital. The Diabetes Care market is seeing major advances in glucose monitors, insulin pens and continuous monitoring equipment. All the advanced features being designed into Medical Devices today require activation by a switch. These switches are made by C&K. C&K switches meet the expectations that come with a medical device: superior performance, high quality and long life cycles.

The switches used to operate and control medical devices must be small and resistant. C&K products are one of the highest performing medical switches in the world and are designed with medical application demands in mind. In addition to the C&K Medical Switch Product Line, we can customize any switch to meet the most demanding customer requirements. In many cases, we already have a variant in our 55,000 + product portfolio.

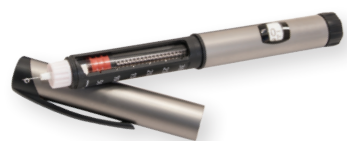

SURGICAL & CRITICAL CARE

Electro-surgery instruments and controllers, Surgical lasers, Respirators, Defibrillators, Minimally invasive surgical tools, Ablation tools, Dissection and closure tools, Sealing and detaching equipment, Hospital beds, Nurse call systems

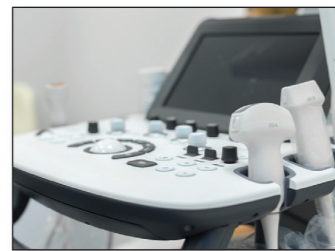

DRUG DELIVERY

Insulin, pain and hormone delivery, Epi pens, Drug dispensing and monitoring

DIAGNOSTIC & MONITORING EQUIPMENT

Ultrasound, Angiography and other imaging equipment, Patient monitors, Blood and urinalysis testing, ECG/EKG machines, Warming cabinets, Autoclaves, Dental equipment

MEDICAL WEARABLES

Tracking and monitoring devices, Hearing aids, Accessories, Audiology equipment

HOME HEALTH CARE

Thermometers, Pulse Oximeters, Blood Pressure and Blood Glucose Monitors, Nebulizers and CPAP machines

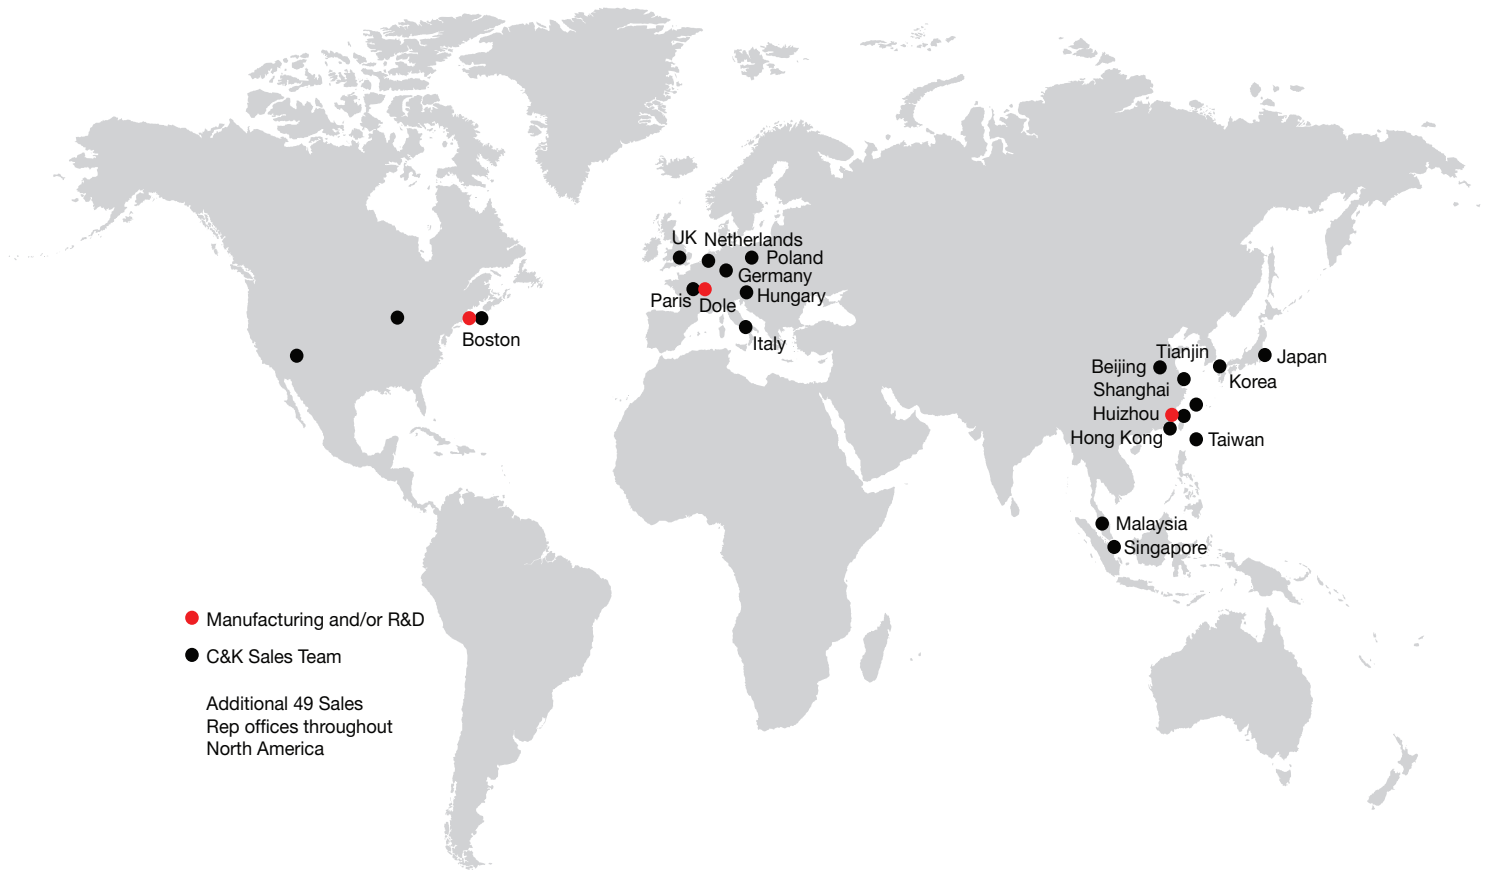

DIABETES CARE

Glucose monitors, Insulin Pens, Insulin pumps
